Streetlight Outage Report

Dedicated PSE&G Streetlight Outage Fax Number: 1-877-511-2141

Date: _____

Contact Name: _____

Municipality: _____

Contact Phone: _____

Check One		Pole Number (or nearest Pole with a number)	Street Address / Location	Nearest Cross Street / Identifying Landmark	Check One or More:				
Initial Report	Status Update				Light Out	Always On	Light Flickers	Broken Missing Parts	Other: Please Describe
X		Pole # 1234	1234 Smith Street (sample)	Maple Avenue (Sample)				X	X Hit by Car

Please Note: Lighting repairs are normally completed during the daylime hours, making it difficult for PSE&G Lamp Inspectors to identify non-functioning lights. Therefore, information regarding the location of the light in question is of primary importance, as well as identifying pole numbers. This information is extremely helpful and will help expedite the repair. If a pole does not have a number, providing PSE&G with the nearest available pole number is just as helpful (*i.e. 1 pole South of pole #12345*).

Thank you for helping us to quicky address your lighting concerns. Should you experience difficulty in submitting this fax, there is a dedicated Streetlight voicemail available for Municipalities and Police Departments at: (888) 223-2022
